

Addendum to the 2023-2024 terms of enrolment

Supplementary to Chapters 2 and 3 of the 2023-2024 terms of enrolment, prospective students ('applicants') with a non-EEA nationality and foreign educational qualifications are subject to the following provisions:

1. Applications for enrolment from 1 September 2023 must be submitted no later than 1 May 2023. Applications submitted after 1 May will be rejected.
If an applicant is unable to complete their registration on time or in full, a reasoned request may be made to the Admissions Committee but only under very exceptional circumstances. The Admissions Committee will determine, after receiving advice from the school board, whether such exceptional circumstances apply and whether they were beyond the control of the applicant. Only if the committee is satisfied that this is the case may the applicant be enrolled.
2. Applicants must take part in the intake process (study choice test). A motivational interview forms part of this intake process. If an applicant receives a negative recommendation on their choice of study, Avans will refuse sponsorship for the IND and offer no assistance with their visa and/or residence permit application. The enrolment application will also be refused by Avans on these grounds.
3. Applicants must make sure the full tuition fee (€8.852) is transferred to and received by Avans' bank account by 15 June 2023. Once it has been established that an applicant is eligible for enrolment on the basis of their existing educational qualifications, the linguistic proficiency requirements, study choice/motivational interview recommendation, further required documents and when the tuition fees have been received by Avans, the visa procedure will be started. If the outstanding tuition fees have not been received by 15 June, the enrolment application will be rejected by Avans.
